## GILBERTSON/SEGUINE RESIDENCE

Our clients came to us shortly after they lost their home and most of their worldly possessions in a disastrous house fire. This home represents both a new beginning and a reclaiming of the land they love. The new home is sited just off center of where the old home had been, but is raised up considerably to take advantage of incredible views and presents itself more dramatically on the landscape. This home incorporates a geothermal ground source heat pump for both cooling and heating and combined with a compact plan keeps energy consumption to a minimum.

Design by Tim Fuller with Carol O'Brien

Construction by Lee Theorin

Photography by Tim Fuller

This project was designed while Tim was at SALA Architects
